DESIGNED BY SIMON PENGELLY

# PIO

DESIGNED BY SIMON PENGELLY

A contemporary twist on the traditional banqueting chair, PIO is designed for use in multiple environments. The unique triangular tube of the frame provides a unique profile whilst providing the high level of comfort, strength and durability that is synonymous with Burgess chairs. The chair achieves a successful balance between technical complexity and aesthetic simplicity. The result is a well proportioned and rationalised

stacking chair which incorporates features such as moulded polyurethane arms, aluminium handle and a retractable linking/numbering device. Using the specially designed trolley, the compact PIO can be stacked 14 chairs high and still pass through a standard doorway. PIO is the first collaboration between Burgess and Simon Pengelly and demonstrates Burgess' commitment to design development.
